

SHAGELDI ALYYEV

NOT FULLSTACK DEVELOPER

PROFILE

I'm a mobile developer passionate about crafting innovative solutions. Skilled in Kotlin Multiplatform, Compose Multiplatform, Android Native Development, React JS, NestJS, and TypeScript, I bring a diverse skill set to every project. Experienced with Kotlin, Jetpack Compose, XML, and Elasticsearch, I thrive in dynamic environments and am always keen to learn and adapt. Just to clarify, I specialize in mobile development—full-stack isn't my thing.

Mobile (android/ios) developer - Freelance

- Create Marketplace android and ios app called "Balary" using kotlin/compose multiplatform. App links here:

[Play store](#) [App store](#)

Currently working on? 2025

Learning new skills....

- I am currently working on Kotlin / Compose Multiplatform. Backend with Ktor. Building map application using maplibre and organic maps open source project. I am building Kotlin Multiplatform shared code application with Native UI SwiftUI and Jetpack compose. I am also using Compose for Desktop Kotlin UI framework. I am working on my own Kotlin Library Ant Design for Kotlin called Kant Design.

I am not static programmer, I always ready to learn new skills and technologies.
